## QR EDGE TAPER

The angular edge taper drives flex energy through the hosel that magnifies power and quick release. Our unique geometry improves response and is more stable and plays stronger.

## MINIMUS CARBON 25

## MINIMUS CARBON 25

This carbon weave is a flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The custom weave is thin and light, yet extremely strong and resistant to damage.

## EDGE BLADE

## EDGE BLADE

New redesigned blade technology. Featuring a unique shape where the blade meets the ice. The Edge Blade design engages the stick like never before making it even easier to load for quick release shots. Our lightweight polymer blade core wrapped with Minimus Carbon 25, enhances puck feel and reduces blade fatigue.

## PL 188 CONSTRUCTION

## PL 188

A completely reengineered construction that provides improved durability and weight reduction – using lower weight fibers and thermoplastic-toughened epoxy resin that creates the consistent level of balance, weight, and durability that our pro players expect.
